Systems & Control Letters 17 (1991) 493–494
North-Holland

Author Index Volume 17 (1991)

(The issue number is given in front of page numbers)

Anderson, J.N. see Y.D. Song (1) 59–70

Bamieh, B., J.B. Pearson, B.A. Francis and **A. Tannenbaum**, A lifting technique for linear periodic systems with applications to sampled-data control (2) 79–88
Barabanov, A.E., LQ optimal control by means of stable regulators (5) 351–356
Battilotti, S. and **W.P. Dayawansa**, Noninteracting control with stability for a class of nonlinear systems (5) 327–338
Bernstein, D.S. see W.M. Haddad (3) 191–208
Bittanti, S. and **M. Campi**, Adaptive RLS algorithms under stochastic excitation – Strong consistency analysis (1) 3–8
Blondel, V., A counterexample to a simultaneous stabilization condition for systems with identical unstable poles and zeros (5) 339–341
Brockett, R.W. and **W.A. Cebuhar**, Optimal compensation of nonlinearities in the presence of noise (5) 375–381

Campi, M. see S. Bittanti (1) 3–8
Cebuhar, W.A. see R.W. Brockett (5) 375–381
Chan, C.Y., Servo-systems with discrete-variable structure control (4) 321–325
Chen, E. and **S. Lafortune**, On nonconflicting languages that arise in supervisory control of discrete event systems (2) 105–113
Chou, J.-H., Stabilization of linear discrete-time systems with actuator saturation (2) 141–144
Conte, G., A.M. Perdon and **G. Marro**, Computing the maximum robust controlled invariant subspace (2) 131–135
Coron, J.-M. and **L. Praly**, Adding an integrator for the stabilization problem (2) 89–104
Costa, O.L.V. and **C.S. Kubrusly**, Lyapunov equation for infinite-dimensional discrete bilinear systems (1) 71–77

Dayawansa, W.P. see S. Battilotti (5) 327–338

Elsner, L. and **C. He**, An algorithm for computing the distance to uncontrollability (6) 453–464

Fagnani, F., An operator-theoretic approach to the mixed-sensitivity minimization problem (3) 227–235
Fagnani, F., Controllability and observability indices for linear time-invariant systems: A new approach (4) 243–250
Feng, G., C. Zhang and **M. Palaniswami**, Stability analysis of input constrained continuous time indirect adaptive control (3) 209–215
Flamm, D.S., A new shift-invariant representation for periodic linear systems (1) 9–14
Fragoso, M.D. see L. Xie (5) 343–350
Francis, B.A. see B. Bamieh (2) 79–88
Fu, M., Interpolation approach to H^∞ estimation and its interconnection to loop transfer recovery (1) 29–36

Garg, V. see R. Kumar (3) 157–168
Georgiou, C. and **N.J. Krikelis**, A design approach for constrained regulation in discrete singular systems (4) 297–304
Gohberg, I., M.A. Kaashoek and **L. Lerer**, A directional partial realization problem (4) 305–314
Guidorzi, R.P., Certain models from uncertain data: The algebraic case (6) 415–424

Haddad, W.M. and **D.S. Bernstein**, Robust stabilization with positive real uncertainty: Beyond the small gain theorem (3) 191–208
Hammarling, S., Numerical solution of the discrete-time, convergent, non-negative definite Lyapunov equation (2) 137–139
Hauser, J., Nonlinear control via uniform system approximation (2) 145–154
He, C. see L. Elsner (6) 453–464
